**Your map is now far larger than before. You can say the same about us.**

There was a time when we were known as Asia's leading pipeline contractors. Not one to rest on our laurels, we've gone a long way since then along with group companies Sembawang and Simon Carves. Thermal power plants, airport terminals and aprons, mass rapid transit systems, highways, tunnels, offshore platforms, refineries, luxury hotels and spas... we've done it all. Of course, it's only to be expected that we have offices in 16 countries and projects in over 60. Making us by far India's second largest engineering construction company. So when it comes to infrastructure creation and management, we'll be there for you every step of the way.
